

Datascape Websites

Create your website with one simple solution.

Build a digital gateway with an easy-to-use Content Management System.

Kick start your website with out-of-the box features to get up and running in weeks.

DATA.COM

Take your online channels to the next level and build an outstanding, modern and responsive website for your community to access vital information and services.

Creating websites can be an overwhelming task. That's why we developed an all-in-one Content Management System (CMS) specifically for councils. Our cloud-based CMS enables you to get your website up and running in a matter of weeks with out-of-the box capabilities.

Designed with simplicity and usability in mind, easily build your website and maintain your content with no coding or design expenses.

With our cloud-based CMS, no software installation is required. Manage content from any web browser, host an unlimited number of websites and benefit from regular updates.

How Datascape Websites works for your organisation?

To design your website, simply choose from our library of website templates and plug in ready-to-use features. Our team can also work with you to create a bespoke design, customised to your needs.

Datascape Websites makes it easy to keep content fresh with an intuitive authoring interface, allowing you to edit pages and upload content. Save time by uploading content once and publish to mobile applications, social media, intranet, digital signage solutions and more.

Datascape Websites secure customer portal and embedded Smart Forms, enable you to provide services directly from your website. Customers have a single view of all their interactions and can access, applications, registrations, submissions and more – without leaving your website.

Customers can also make instant payments with embedded credit and debit card payment forms, which can integrate with any enterprise resource planning system.
